COMMERCIAL USE OF OUTPUTS

PRODUCT PHOTOGRAPHY PP-02

Glass Perfume Bottle on Wet Stone

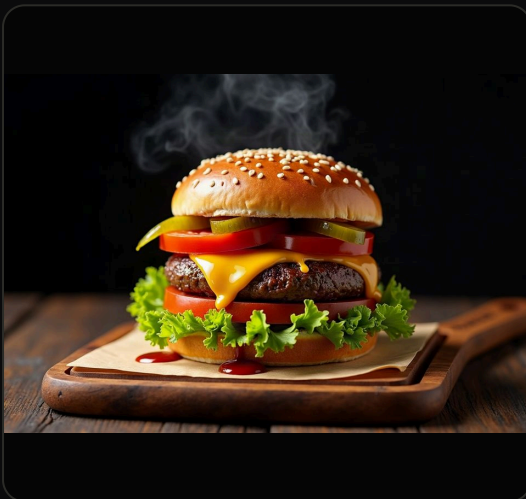

Luxury product photograph of a faceted amber glass perfume bottle with a plain brushed-gold cap, standing on dark wet river stone, water droplets, a single hard rim light from behind creating a glowing edge, black background, reflections on the stone surface, ultra clean, no label text

WHAT CAN GO WRONG

Models tend to invent label text; the phrase 'no label text' helps but a stray glyph can still appear. Retry with another seed if it does.

VARIATION TIPS

- Replace amber with pale blue glass for a fresh, aquatic scent mood.
- Use 'soft diffused top light' instead of rim light for a gentler look.
- Add 'a single fern frond in the foreground, out of focus' for depth.

FOOD & DRINK FD-04

Burger Hero Shot

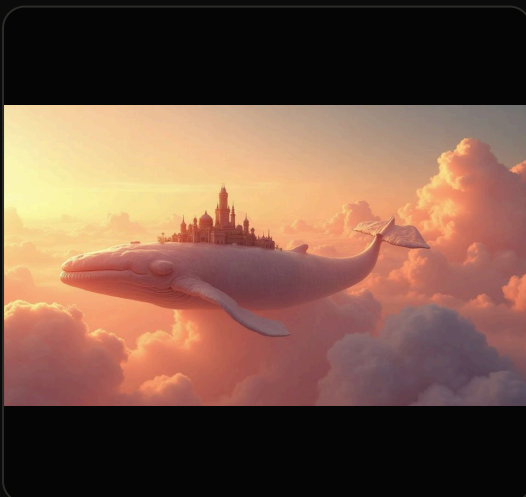

Studio food photograph of a towering cheeseburger with a juicy patty, melting cheddar, crisp lettuce, tomato, pickles, and a toasted sesame bun on a wooden board, drips of sauce, dark background, rim light, steam wisps, no branding or paper wrappers with text

WHAT CAN GO WRONG

Sesame seeds and layers often look random, which is fine. Wrappers sometimes carry garbled text; avoid mentioning paper.

VARIATION TIPS

- Add 'a side of fries in a metal cup' for combo shot.
- Try a black bun for a trendy twist.
- Use cooler lighting for a gourmet-restaurant vibe.

FANTASY & SCI-FI LANDSCAPES FS-18

Sky Whale Migration

Fantasy scene of enormous translucent sky whales drifting through a golden sunset sky among pink clouds, small villages carried on their backs, soft light, a dreamlike atmosphere, painterly style, vast scale

WHAT CAN GO WRONG

Villages on backs become random textures; accept it as a surreal look.

VARIATION TIPS

- Change to a night version with glowing patterns.
- Add a flock of small birds.
- Use an aerial view above clouds.

ISOMETRIC & 3D ICONS IC-04

Isometric Island Village

Isometric 3D illustration of a floating island village with small colorful houses, a tiny windmill, a pond, trees and a wooden bridge, soft clouds around, bright blue background, toy-like clean render, soft shadows, isometric view

WHAT CAN GO WRONG

Isometric angle drifts toward regular perspective in some seeds. Repeat 'isometric view, 30-degree angle' and keep the background a flat color.

VARIATION TIPS

- Make it winter.
- Switch to a futuristic city on an island.
- Add a lighthouse.

POSTERS & TYPOGRAPHIC LAYOUTS PT-08

Space Exploration Poster

Retro 1960s space-race style poster, a stylized rocket launching beside a ringed planet, flat colors of navy, orange, and cream, the word 'ORBIT' in bold condensed letters at the bottom, starfield with tiny dots, vintage print texture, no logos

WHAT CAN GO WRONG

Vintage poster textures come out reliably, but the rocket and lettering are simplified and the bottom word can warp. Avoid naming real agencies: the model may add emblem-like shapes.

VARIATION TIPS

- Change rocket to a lunar lander shape.
- Use a teal/cream palette.
- Add a lone astronaut silhouette (no flag).

WHAT YOU GET IN THE FULL VAULT

Every prompt page has the prompt, the real generated output, the model used, a failure note and variation tips. The full pack also includes a Markdown file, a prompts.json file and all 250 images in a ZIP.

250 prompts, 10 categories
